## Financial Controller

### Description

Our client, a specialist construction company, seeks Financial Controller to lead a change in systems and reporting practices enabling the company to receive effective, paperless and incisive financial reports. Reporting to the CFO.

### Responsibilities

- Lead the documentation of all financial processes and controls
- Lead the documentation of the delegated financial authority matrix
- Perform a quarterly review of the integrity of financial ledgers
- Support the CFO with Mergers and Acquisitions activity as required, to include a review of the Target's financial control environment
- Support other such activity as requested by the Chief Financial Officer from time to time

### Qualifications

The ideal candidate will possess an ACA or ACCA qualification and have had the experience of IFRS and UK GAAP. In addition, he or she will possess:

- A desire to work in a fast-paced team environment, with a robust and enthusiastic personality and the ability to meet strict deadlines
- An understanding of the control environment and reporting requirements demanded by a Group finance function
- High standards and a desire to develop both themselves and their role over time
- Excellent communication skills, with an ability to engage with stakeholders of all levels across different departments and divisions
- A high level of computer literacy. Knowledge of the Summit 5000 accounting system is an advantage, but not essential
